U.S.S.N. 10/706,243 Filed: November 12, 2003

AMENDMENT AND RESPONSE TO OFFICE ACTION

CENTRAL FAX CENTER JUL 0 6 2006

Amendment

In the Claims

Claims 1-15 (canceled).

- 16. (currently amended) Dry microparticles having a size range of between 0.5 and ten microns comprising a drug to be delivered by inhalation, wherein the microparticles are formed of a material releasing drug at a pH of greater than 6.0, wherein the material is selected from the group consisting of proteins, polymers of mixed amino acids, polysaccharides, lipids and surface active agents.
- 17. (previously presented) The dry microparticle of claim 16 wherein the material is a surface active agent or surfactant.
- 18. (previously presented) The dry microparticle of claim 16 wherein the material is a lipid.
- 19. (previously presented) The dry microparticle of claim 16 wherein the proteins are hydrophilic proteins.
- 20. (previously presented) The dry microparticle of claim 16 wherein the proteins are hydrophobic proteins.
- 21. (currently amended) The dry microparticle of claim 16 wherein the polysaccharides are selected from the group consisting of aliginate alginate and chitosan.
- 22. (previously presented) A cartridge for insertion into an inhaler comprising dry microparticles having a size range of between 0.5 and ten microns comprising a drug to be PDT 103 CON(3) 45067935 078374/00032

U.S.S.N. 10/706,243 Filed: November 12, 2003 AMENDMENT AND RESPONSE TO OFFICE ACTION

delivered by inhalation, wherein the microparticles are formed of a material releasing drug at a pH of greater than 6.0, wherein the material is selected from the group consisting of proteins, mixed amino acids, polysaccharides, lipids and surface active agents.

- 23. (currently amended) A method for delivery of microparticles to the pulmonary system comprising: administering to a patient in need of treatment an effective amount of microparticles which comprise a diketopiperazine and an active agent and which have a diameter between 0.5 microns and ten microns, in a pharmaceutically acceptable carrier for administration to the lungs, wherein the carrier is air, and wherein the active agent is released from the microparticle at a pH of greater than 6.0.
- 24. (previously presented) The method of claim 23, wherein the diketopiperazine has the formula 2, 5 -diketo-3,6-di(4-X-aminobutyl)piperazine, wherein X is selected from the group consisting of succinyl, glutaryl, maleyl, and furmaryl.
 - 25. (previously presented) The method of claim 24, wherein X is fumaryl.
- 26. (currently amended) The method of claim 23, wherein the agent is a therapeutic agent selected from the group consisting of insulin, calcitonin, felbamate, heparin, parathyroid hormone and fragments thereof, growth hormone, erythropoietin, zidovudine (AZT), didanosine (DDI), granulocyte colony stimulating factor (G-CSF), lamotrigine, chorionic gonadotropin releasing factor, luteinizing releasing hormone, ÿ-galactosidase, and Argatroban.
- 27. (previously presented) A microparticulate system for controlled drug delivery to the pulmonary system comprising: microparticles incorporating therein a therapeutic, prophylactic or PDT 103 CON(3) 45067935 078374/00032

AMENDMENT AND RESPONSE TO OFFICE ACTION

diagnostic agent, wherein the microparticles have a diameter between 0.5 microns and ten microns and are formulated to release the incorporated agent at a pH of 6.0 or greater under conditions present in the pulmonary system, in a pharmaceutically acceptable carrier for administration to the lungs, wherein the carrier is air, and wherein the microparticles are made from a material selected from the group consisting of diketopiperazines, poly(hydroxy acids), polyanhydrides, polyesters, polyamides, polycarbonates, polyalkylenes, polyvinyl compounds, polysiloxanes, polymers of acrylic and methacrylic acids, polyurethanes and co-polymers thereof, poly(butic acid), poly(valeric acid), poly(lactide-co-caprolactone), polysaccharides, copolymers and mixtures thereof.

- 28. (previously presented) The system of claim 27, wherein the material is a diketopiperazine.
- 29. (previously presented) The system of claim 28, wherein the diketopiperazine has the formula 2, 5 -diketo-3,6-di(4-X-aminobutyl)piperazine, wherein X is selected from the group consisting of succinyl, glutaryl, maleyl, and furmaryl.
 - 30. (previously presented) The system of claim 29, wherein X is fumaryl.
- 31. (previously presented) The system of claim 27, wherein the agent is a therapeutic agent selected from the group consisting of insulin, calcitonin, felbamate, heparin, parathyroid hormone and fragments thereof, growth hormone, erythropoietin, zidovudine (AZT), didanosine (DDD), granulocyte colony stimulating factor (G-CSF), lamotrigine, chorionic gonadotropin releasing factor, luteinizing releasing hormone, y -galactosidase, and Argatroban.

AMENDMENT AND RESPONSE TO OFFICE ACTION

- 32. (previously presented) A method for controlled drug delivery to the pulmonary system comprising: administering to a patient in need of treatment an effective amount of microparticles incorporating therein a therapeutic, prophylactic or diagnostic agent, wherein the microparticles have a diameter between 0.5 microns and ten microns and are formulated to release the incorporated agent at a pH of 6.0 or greater under conditions present in the pulmonary system, in a pharmaceutically acceptable carrier for administration to the lungs, wherein the carrier is air, and wherein the microparticles are made from a material selected from the group consisting of diketopiperazines, poly(hydroxy acids), polyanhydrides, polyesters, polyamides, polycarbonates, polyalkylenes, polyvinyl compounds, polysiloxanes, polymers of acrylic and methacrylic acids, polyurethanes and co-polymers thereof, poly(butic acid), poly(valeric acid), poly(lactide-co-caprolactone), polysaccharides, copolymers and mixtures thereof.
- 33. (previously presented) The method of claim 32, wherein the material is a diketopiperazine.
- 34. (previously presented) The method of claim 33, wherein the diketopiperazine has the formula 2, 5 -diketo-3,6-di(4-X-aminobutyl)piperazine, wherein X is selected from the group consisting of succinyl, glutaryl, maleyl, and furmaryl.
 - 35. (previously presented) The method of claim 34, wherein X is fumaryl.
- 36. (previously presented) The method of claim 32, wherein the agent is a therapeutic agent selected from the group consisting of insulin, calcitonin, felbamate, heparin, parathyroid hormone and fragments thereof, growth hormone, erythropoietin, zidovudine (AZT), didanosine 5 PDT 103 CON(3) 45067935
